

Katja Wodjereck appointed Chief Commercial Officer of Vioneo

3. December 2024, Vioneo is excited to announce the appointment of Katja Wodjereck as Chief Commercial Officer. A seasoned executive with over 20 years of industry experience, Katja brings expertise in driving commercial success and advancing sustainability in the chemical industry.

Katja Wodjereck most recently served at Neste, where she joined as Executive Vice President of the Renewable Road Transportation division in April 2023 and was later appointed Executive Vice President of Renewable Products in November 2023. Prior to her tenure at Neste, Katja Wodjereck held various leadership positions at Dow, including serving as President and General Manager of DACH, as well as holding several board positions.

Katja Wodjereck will lead Vioneo's commercial strategy with a key focus on global business, partnerships and advocacy.

CEO of Vioneo, Alex Hogan: "I am delighted to announce that Katja Wodjereck will become our Chief Commercial Officer, her track record of commercialising sustainable products and her deep understanding of the industry leave her uniquely placed to drive the commercial success of the business"

Katja Wodjereck: "I am thrilled to be joining Vioneo. Their mission to create fossil-free polymers truly resonates with my own values and what I believe we need for a sustainable future. It's inspiring to see how Vioneo is revolutionizing the industry by using green feedstock, ensuring everything is traceable, and taking real action to cut CO2 emissions. With A.P. Moller Holding's support, Vioneo is paving the way for green methanol solutions and aims to lead the world in fossil-free polymer production. I can't wait to work with all our stakeholders to make this ambitious vision come true."
